For the first time since the inception of THE Aesthetic Show, the black tie awards ceremony THE Aesthetic Awards was conceived to honor some of the industry's best clinical results. Taking place at The ARIA Resort in Las Vegas, the event was hosted by *The Doctors* Dr. Drew Ordon and judged by a group of industry leaders comprised of renowned plastic surgeons, dermatologists and members of the media who cover aesthetics, including American Health and Beauty's Editor in Chief, Keith Veseleny.

Winner of the Best Non-Surgical Body Contouring Enhancement Award, Dr. Robert Troell has two offices: one in Laguna Beach, CA and the other in Las Vegas, NV specializing both in the face and the body. Considered an expert in the field of plastic surgery, Dr. Troell has authored numerous papers and performed live surgical courses on advanced liposuction techniques and face and body fat grafting.

The patient results which won Dr. Troell the Best Non-Surgical Body Contouring Enhancement Award was achieved with the VASER Shape treatment. "This technology uses a one megahertz ultrasound device and massage hand piece to optimize the treatment of excess fatty areas, tighten loose skin, and even smooth out cellulite skin contour irregularities or irregularities caused by previous liposuction," says Dr. Troell, "I was the first in the United States to acquire the device from the sole supplier, Sound Surgical Technologies and was featured on *The Doctors* in January of this year with another excellent result and joyful patient."

Dr. Robert Troell wins Best Non-Invasive Body Shaping Enhancement Award at THE Aesthetic Show

Actual Vaser Shape Results of Dr. Robert Troell

The 43 year old patient came to see Dr. Troell regarding her weight gain after injuring her Achilles tendon. Previously a competitive runner, Dr. Troell's patient was having trouble losing the weight she had gained after her injury. "Her main concerns were excess fatty tissue, mild skin laxity and some skin contour irregularities. She preferred not to have surgery, did not want any downtime and minimal to no pain and bruising," describes Dr. Troell, "She elected to have a nonsurgical method with no downtime, no anesthesia and no post-treatment pain known as the VASER Shape."

While the patient's weight remained the same after the treatment, her abdominal circumference decreased over 2 inches after just 2 treatments with observed skin tightening and no complications. Dr. Troell says, "Additional treatments can improve on this result, which take only one hour of the patients busy daily schedule."

Dr. Troell is currently comparing all types of non-invasive body enhancing devices in a direct side by side comparison to determine scientifically the better treatment options without medical device company bias. However he does say, "The VASER Shape procedure was successful in achieving my patient's desires of no pain and no downtime with an excellent body shaping outcome."
